The Patent Pending Little Black Stick Gets Creative with Balloons and Inventive Ideas!

Sticks Hint #17

Add Balloon Swags Between Sticks To Create A Magical Colorful Pathway or Visual

Here's an idea! Attach a string through the loops between a line of several STICKS (at least four STICKS are recommended). Tie the string to the first and last loop. Balloons can be tied to the string (just like a balloon column) or clipped. You can use helium or air filled balloons as it is more attractive if the balloon swags dip up and down (see photo). STICKS should be at least 5 feet apart and make sure you have enough slack to create the natural look of the swag. Also add balloon columns or bunches to the top of each loop. It is an amazing visual! This creative way to display balloons is only possible by using the Balloons on a Stick accessory and it creates captivating and magical appeal that is sure to set your property apart from the competitors! It takes a little more work, but your traffic increases will be incredible!

**“Balloons!
More Creatively And
More Effectively
at Virtually Any
Property!”**

Quinn Tant, Lane Company

At Least Four (4) STICKS Are Suggested For Three (3) Swags InBetween. Tie Balloon Columns or Bunches To The Top Loops For A Stunning Effect. Balloon Swags Can Be Used For Front Curb Appeal As A Traffic Builder Or Around The Office And To Draw Attention To Property Amenities!
